SECTION 1 - INTRODUCTION

The purpose of this manual is to provide information necessary to submit eligibility inquiries to New Jersey Medicaid electronically. This manual is to be used in conjunction with the HIPAA ASC X12 Standards for Electronic Data Interchange Technical Reports Type 3 (TR3s) implementation guides. The HIPAA TR3s can be obtained exclusively from the Washington Publishing Company and are available for download from their website at www.wpc-edi.com or by calling 425-562-2245. The HIPAA TR3s provide the majority of the HIPAA transaction and code set requirements, compared to the New Jersey Medicaid Companion Guide, which only provides the supplemental requirements specific to New Jersey Medicaid, as permitted within the structure of the HIPAA transaction sets. All providers who submit eligibility inquiries electronically to New Jersey Medicaid must adhere to the HIPAA TR3s and the New Jersey Medicaid Companion Guide requirements.

The New Jersey Medicaid Management Information System (NJMMIS) currently provides up-to-date beneficiary eligibility information through its Recipient Eligibility Verification System (REVS). REVS is a "voice" system and requires the use of a touch tone phone. Providers view the REVS system as helpful but prefer a more automated method such as the use of PC or POS devices to initiate eligibility inquiries and to receive formatted responses to these inquiries. The real time Medicaid Eligibility Verification System (MEVS) will furnish medical providers access to beneficiary eligibility data within the NJMMIS via telecommunications network vendors.

MEVS provides the interface that will allow providers to submit Eligibility Verification Requests in real time to Gainwell Technologies using American National Standards Institute (ANSI) Accredited Standards Committee (ASC) X12 EDI Health Care Eligibility/Benefit Inquiry transaction set 270 version 5010 for eligibility inquiries and X12 transaction set 271 version 5010 for the receipt of responses to these eligibility inquiries. Additional information regarding the ANSI X12 270 and 271 transactions may be found at www.wpc-edi.com or can be obtained by writing to:

Data Interchange Standards Association Inc.
Publications Department
1800 Diagonal Road, Suite 355
Alexandria, VA 22314-2853

SECTION 2 - GENERAL INFORMATION

2.1 Eligibility Information Available

The Medicaid Eligibility Verification System will make available information for beneficiaries (recipients) enrolled in the Medicaid Program, the Pharmaceutical Assistance For the Aged and Disabled Program, the Senior Gold Program, the Cystic Fibrosis Program, the General Assistance Program, the Family Care Program and the ADPP Program. The information that will be available for the beneficiaries is:

- Basic Program Eligibility Data
- Beneficiary Lock In Data
- Beneficiary Managed Care Enrollment Data
- Beneficiary Special Program Enrollment Data
- Beneficiary Medicare Part A Enrollment Data
- Beneficiary Medicare Part B Enrollment Data
- Beneficiary Private Health Insurance Enrollment Data

2.2 MEVS supports the following search options

Although a variety of inquiry options are supported, the primary and preferred method is using the Recipient Identification Number.

- Card Control Number and Date Of Birth
- Recipient Identification Number assigned to the Beneficiary
- Beneficiary's Social Security Number and Date Of Birth
- Beneficiary's Full Name (Last Name, First Name) and Date Of Birth
- Beneficiary's Full Name and Social Security Number
- State Bureau Identification (SBI – Unique State Prison Case Number)

2.3 Dates of Inquiry/Eligibility

Providers will be permitted to initiate an inquiry for up to a three calendar month time period. The inquiry date span cannot be beyond the end of month following the current month. For example, if today's date is September 15 then the inquiry date cannot exceed October 31. Providers should be aware that the eligibility for claim payment is not guaranteed beyond the end of the current month.

The placement of eligibility dates returned in the 271 response will depend on the number of eligibility segments (EB segments) being returned. If only one eligibility segment (EB segment) is returned then the eligibility begin/end dates will be returned in the 2100C DTP segment. If multiple eligibility segments (EB segments) are being returned in the 271 then the eligibility begin/end dates will be returned in the 2110C DTP segment.

2.4 Hours Of Operation

The Medicaid Eligibility Verification System will be available 24 hours a day, six days a week Monday through Saturday. MEVS will be available 19 hours on Sunday with a maintenance downtime between 12:00 a.m. - 5:00 a.m.

2.5 Business Hours Support

Gainwell Technologies will provide help desk services during the hours of 8:00 a.m. to 5:00 p.m. Eastern Time, Monday thru Friday. A specific telephone number and e-mail address has been established for access to Gainwell Technologies help desk staff. This telephone number is (609) 588-6113. The e-mail address is njmmisedi@gainwelltechnologies.com. Help desk staff are available to assist both switch vendors and software vendors with technical information regarding MEVS.

2.6 After Hours Support

For assistance outside of normal business hours or on a Gainwell Technologies holiday you may contact the Gainwell Technologies IT Network Operations mailbox – njmmislan@gainwelltechnologies.com or by phone at (609) 588-6001.

Before contacting the Help Desk or Gainwell Technologies IT staff, determine if the issue you are having is an application issue or connectivity/network issue. Once the issue has been determined contact the appropriate help desk and describe the problem.

Please include the 3-character Switch ID assigned to you by Gainwell Technologies in the subject line of your e-mail to identify your organization.

Gainwell Technologies holidays are noted on the NJ Medicaid/MCO Encounters Claims Submission Deadline Schedule found in the FAQ link on the NJMMIS website www.njmmis.com. Choose a Topic of Electronic Claims, click on Search and look for “What is the NJ Medicaid/Encounter EDI Claims Submission Deadline Schedule”.

Providers who are unable to obtain the requested eligibility information through MEVS are not to contact Gainwell Technologies help desk staff to obtain the necessary confirmation of eligibility data. Providers are to direct such inquiries to the Gainwell Technologies Provider Services Department at (800) 776-6334.

Providers who have questions regarding the actual eligibility determination process, policy issues, or service limitations that may be applicable to the beneficiary should direct these inquiries to the State Office of Beneficiary and Provider Services (OBPS). The OBPS can be reached by telephone at (609) 588-2933.

2.7 New Switch Vendor Approval Process

The following are the steps necessary to take to become an approved MEVS network switch vendor:

1. Send a letter to the State to request a Business Associate Agreement at the following address. The request is to be on company letterhead with a brief overview of the applicant's business and clients, and why switch access is needed. The request letter should include contact information, including an e-mail address.

Kellie Pushko
Regulatory Officer
NJ Division of Medical Assistance and Health Services
Office of Legal & Regulatory Affairs
P.O. Box 712
Trenton, NJ 08625-0712

Email: Kellie.Pushko@dhs.nj.gov
Phone: (609) 588-3004
Fax: (609) 588-7343

2. The Switch Vendor and Gainwell Technologies must both receive **written approval** signed from the State of New Jersey before proceeding to any of the steps below. Such approvals are subject to the successful completion of a background check, to be initiated by the State of New Jersey.
3. Upon receipt and approval of the Business Associate Agreement, the State will notify Gainwell Technologies of approval of the new switch vendor and provide Gainwell Technologies with technical contact information for the switch vendor.
4. Upon receipt of the notice of approval and technical contact information from the State, Gainwell Technologies will contact the switch vendor to set a schedule for the vendor to establish

telecommunications between the switch vendor and Gainwell Technologies in Trenton, NJ and between the switch vendor and Gainwell Technologies in West Jordan, UT as listed in the section below "Telecommunications Specifications".

5. Once telecommunications have been established to both the Trenton, NJ and the West Jordan, UT locations, then the switch vendor may begin sending test MEVS transactions. Gainwell Technologies will contact the switch vendor to provide test scenarios and test data.
6. Once the switch vendor has completed testing requirements as listed below in section "Vendor Testing Requirements" Gainwell Technologies will notify the switch vendor of approval to begin submitting production MEVS transactions.
7. A new Business Associate Agreement must be completed with the State if the switch vendor changes ownership or name of the company.

2.8 Telecommunications Specifications/WEB Specifications

For TCP/IP:

Gainwell Technologies will support the industry standard TCP/IP Network protocol between the switch vendor and Gainwell Technologies. The switch vendor will be responsible for all costs associated with the establishment and ongoing maintenance of telecommunications capabilities between the switch vendor and Gainwell Technologies. Vendors will provide a dedicated T-1 or ISDN circuit to both the Trenton and West Jordan facilities. The vendors will also be responsible for providing Gainwell Technologies with a modem, a rack mount router and a CSU/DSU card for placement in the Gainwell Technologies Data Centers at both Trenton, NJ and West Jordan, UT for each circuit maintained by the switch.

The New Jersey Medicaid program does not support site to site VPN connections for Switch Vendors.

For this option, Gainwell Technologies requires the switch vendor to provide a Point to Point data circuit from their facility to both the primary site located in Trenton, NJ and the backup site located in West Jordan, UT. Both lines must be installed and active before any application testing can begin. Therefore both lines should be ordered simultaneously following the instructions below:

A. Connectivity for Trenton, NJ

- Gainwell Technologies supports connections via TCP/IP only.
- You must provide a secure point to point circuit between your facility/host and the Gainwell Technologies Host. Order a T-1 or ISDN circuit for the primary site in Trenton, NJ. Data circuit should be sized to meet vendors data transfer needs.
- A 1U or 2U 19" **rack mountable** router configured with a CSU/DSU or ISDN card (depending on type of circuit selected).
- The CSU/DSUs must be contained in each router as an add-on card and must include rack mounting hardware for a standard 19" electronics rack.
- In addition, a cable from the Router to the patch panel is required (15 ft). The cable must terminate in an RJ45 (CAT 5 STP recommended).

Site Address:

Gainwell Technologies
Attn: Syed Quadri
3705 Quakerbridge Road
Suite 101
Trenton, NJ 08619-1288

Point of Contact:

Syed Quadri
Manager IT - NJMMIS
NJ IT Duty Pager: (609) 588-6001 (*1st point of contact for Syed*)
Office: (609) 588-6117
Mobile: (609) 929-4628
Email: squadri6@gainwelltechnologies.com

B. Connectivity for West Jordan, UT

- Gainwell Technologies supports connections via TCP/IP only.
- You must provide a secure point to point circuit between your facility/host and the NJMMIS Host. Order a T-1 or ISDN circuit for the alternate site in West Jordan, UT. Data circuit should be sized to meet vendors data transfer needs.
- A 1U or 2U 19" **rack mountable** router configured with a CSU/DSU or ISDN card (depending on type of circuit selected).
- The CSU/DSUs must be contained in each router as an add-on card and must include rack mounting hardware for a standard 19" electronics rack.
- In addition, a cable from the Router to the patch panel is required. The cable must terminate in an RJ45 (CAT 5 STP recommended). The length of the cable will need to be coordinated with Gainwell Technologies prior to installation.

Site Address:

Gainwell Technologies
Attn: Syed Quadri
3333W 9000 S
West Jordan, UT 84088

Point of Contact:

Syed Quadri
Manager IT - NJMMIS
NJ IT Duty Pager: (609) 588-6001 (*1st point of contact for Syed*)
Office: (609) 588-6117
Mobile: (609) 929-4628
Email: squadri6@gainwelltechnologies.com

NOTE: The Telco DEMARC is located in a separate room at each site.

1. West Jordan, UT: The DEMARC is 600 feet from the rack housing the CSU/DSU.
2. Trenton, NJ: The DEMARC is located on the first floor in the Telco closet next to the elevator in the center of the building. The LEC (local exchange carrier) must be instructed to cross connect from the DEMARC to our extended DEMARC extension also located a few feet from the DEMARC.
3. The connection between the Extended DEMARC and the rack will be provided by Gainwell Technologies.
4. A dedicated modem line will not be provided but will be made available on an as needed basis to allow the vendor to troubleshoot their router.

C. Vendor/Gainwell Technologies Responsibilities

- The Vendor will configure the router prior to shipping. After Gainwell Technologies receives a router the hardware will be rack mounted in the datacenter.
- The Vendor will maintain all hardware that is vendor owned at each Gainwell Technologies facility.
- The Vendor will be responsible for communication links between the vendor's site(s) and Gainwell Technologies facilities. This includes contacting the contracted telecommunications company.
- Gainwell Technologies staff will allow access to telecommunications support staff where needed for installation or troubleshooting purposes.
- Gainwell Technologies staff will assist the vendor in power cycling hardware and any visual assistance when available.

D. IP Connections

The Vendor is responsible for all IP addressing space up to, but not including the Ethernet interface of the Vendor router located at the Gainwell Technologies facilities. On the vendor's router at the Trenton and West Jordan facility, the Ethernet interface must be configured with a Gainwell Technologies provided IP address. All traffic from the WAN interface on this router must be NATted (Hide NAT) to the Ethernet interface IP address. **Gainwell Technologies does not allow routing of any private addresses.** The vendors Ethernet interface will be connected to a DMZ which is then connected to a firewall.

E. Stateful Firewall Inspection

Connections between the Switch Vendors and Gainwell Technologies will run through a stateful firewall inspection. Connections running through a stateful firewall are subject to (inactivity and total) time-outs. Vendor will need to implement keep-alives on their host to avoid becoming disconnected. Connections will be made available all hours of MEVS operation with exceptions only in case of emergency or with advance notice.

Once the data circuit has been installed and your equipment is received at both sites, coordinate with Syed Quadri to obtain IP Addresses and to finish up the setup of the routers.

Once connectivity has been established and tested to both sites, the vendor can now proceed to complete application testing.

For Web Submission:

Switch vendor will provide Gainwell Technologies with their Hosts public IP address. Firewall rules will be put in place to only allow traffic from this registered IP Address. Switch vendors using the Web Submission method will also be subject to Stateful Firewall Inspection as stated above.

Gainwell Technologies will support the two envelope standards outlined in CAQH/CORE rule 270 – HTTP+MIME and SOAP+WSDL - for X12 270 Eligibility Inquiry Transactions submitted over the Web. Real time 270 requests are limited to one inquiry, per beneficiary, per transaction. For more details on CAQH/CORE Rules 159 and 270, or other operating rules, please visit <http://www.caqh.org>.

A. HTTP+MIME

For MIME (Multipurpose Internet Message Extensions) messages, the format used must be that of multipart/form-data. X12 271 Responses will also be returned as multipart/form-data.

Submissions of 270 eligibility inquiry transactions using an HTTPS MIME multipart request should be made to:

<https://caqhcore.njmmis.com/MIME/Upload>

Below is an example of an HTTP MIME Multipart submission. The HTTP header is shaded in blue. The remainder of the request (shaded in light grey) is the body of the MIME message.

NOTES: the spacing between 'name =' and the data value is important and must be accounted for with CRLF. The boundary value shown is for example purposes only.

```
POST /MIME/Upload HTTP/1.1
Host: caqhcore.njmmis.com
Content-Length: 2408
Content-Type: multipart/form-data; boundary=XbCY
```

```
--XbCY
Content-Disposition: form-data; name="PayloadType"
```

```
X12_270_Request_005010X279A1
--XbCY
Content-Disposition: form-data; name="ProcessingMode"
```

```
RealTime
--XbCY
Content-Disposition: form-data; name="PayloadID"
```

e51d4fae-7dec-11d0-a765-00a0c91e6da6
 --XbCY
 Content-Disposition: form-data; name="TimeStamp"

2007-08-30T10:20:34Z
 --XbCY
 Content-Disposition: form-data; name="UserName"

hospa
 --XbCY
 Content-Disposition: form-data; name="Password"

8y6dt3dd2
 --XbCY
 Content-Disposition: form-data; name="SenderId"

HospitalA
 --XbCY
 Content-Disposition: form-data; name="ReceiverID"

PayerB
 --XbCY
 Content-Disposition: form-data; name="CORERuleVersion"

2.2.0
 --XbCY
 Content-Disposition: form-data; name="Payload"; filename="name.dat"
 Content-Type: application/octet-stream

<contents of 270 file go here **as an attachment**>
 --XbCY—

The valid values for the MIME body elements are as follows:

- PayloadType – X12_270_Request_005010X279A1
- ProcessingMode – RealTime
- PayloadID – Should conform to ISO UUID standards (described at <ftp://ftp.rfceditor.org/in-notes/rfc4122.txt>), with hexadecimal notation, generated using a combination of local timestamp (in milliseconds) as well as the hardware (MAC) address35, to ensure uniqueness.
- TimeStamp – In the form of YYYY-MM-DDTHH:MM:SSZ; see <http://www.w3.org/TR/xmlschema11-2/#dateTime>
- UserName – Will be supplied to you by Gainwell Technologies
- Password – Will be supplied to you by Gainwell Technologies
- SenderId – This will match your three character vendor ID as assigned to you by Gainwell Technologies, and normally valued in ISA06 of the 270 transaction. On the return of the 271 response, Gainwell Technologies will value '610515'.
- ReceiverID – Please enter '610515' as normally valued on ISA08 of the 270 transaction. On the return of the 271 response, Gainwell Technologies will value with your three character vendor ID which was sent in the Sender ID field with the 270 transaction.
- CORERuleVersion – 2.2.0

Below is an example of an HTTP MIME Multipart response:

```

HTTP/1.1 200 OK
Content-Length: 2408
Content-Type: multipart/form-data; boundary=XbCY
--XbCY
Content-Disposition: form-data; name="PayloadType"
X12_271_Response_005010X279A1
--XbCY
Content-Disposition: form-data; name="ProcessingMode"
RealTime
--XbCY
Content-Disposition: form-data; name="PayloadID"
f81d4fae-7dec-11d0-a765-00a0c91e6da6
--XbCY
Content-Disposition: form-data; name="TimeStamp"
2007-08-30T10:20:34Z
--XbCY
Content-Disposition: form-data; name="SenderID"
PayerB
--XbCY
Content-Disposition: form-data; name="ReceiverID"
HospitalA
--XbCY
Content-Disposition: form-data; name="CORERuleVersion"
2.2.0
--XbCY
Content-Disposition: form-data; name="ErrorCode"
Success
--XbCY
Content-Disposition: form-data; name="ErrorMessage"
None
--XbCY
Content-Disposition: form-data; name="Payload"
<contents of 271 file go here as an attachment >
    
```

B. SOAP+WSDL

SOAP (Simple Object Access Protocol) messages must conform to standards set forth by the WEB Services Description Language (WSDL) for XML envelope formatting, submission, and retrieval. Submissions of 270 eligibility inquiry transactions using the SOAP+WSDL request should be made to:

<https://caqhcore.njmms.com>

The XML schema definition can be found at:

<http://www.caqh.org/SOAP/WSDL/CORERule2.2.0.xsd>

The WSDL definitions can be found at:

<http://www.caqh.org/SOAP/WSDL/CORERule2.2.0.wsdl>

All payloads must be embedded using the inline method (CDATA element) for real-time SOAP transactions. All SOAP transactions must conform to SOAP version 1.2. Below is an example of a SOAP submission. The HTTP header is shown in blue. The WS-Security Username and Password token (shown in a pink background) is added to the SOAP header by the platform on which SOAP is run. The SOAP platform's Web-Services Security Extensions may be configured to add these tokens. The portion of the SOAP envelope shaded in green has the remaining Metadata that is defined as part of CORE connectivity rule.

```
POST https://caqhcore.njmms.com/ HTTP/1.1
Accept-Encoding: gzip,deflate
Content-Type: application/soap+xml; charset=utf-8
Content-Length: 2754
Host: caqhcore.njmms.com
Connection: Keep-Alive
User-Agent: Apache-HttpClient/4.5.5 (Java/12.0.1)
```

```
<s:Envelope xmlns:s="http://www.w3.org/2003/05/soap-envelope"

```

There are three levels of error validation done on either a MIME or SOAP request:

- 1) HTTP - Errors with connectivity, authorization, etc., will be reported at this level.
 - HTTP 200 OK – no errors
 - HTTP 400 Bad Request – error with HTTP header
 - HTTP 401 Unauthorized – username/password invalid
 - HTTP 500 Internal Server error – unexpected error during processing

- 2) Errors regarding structure or data in the MIME or SOAP body will be reported at this level.
 - Success – no errors
 - PayloadTypeRequired – The field PayloadType is required but was not provided

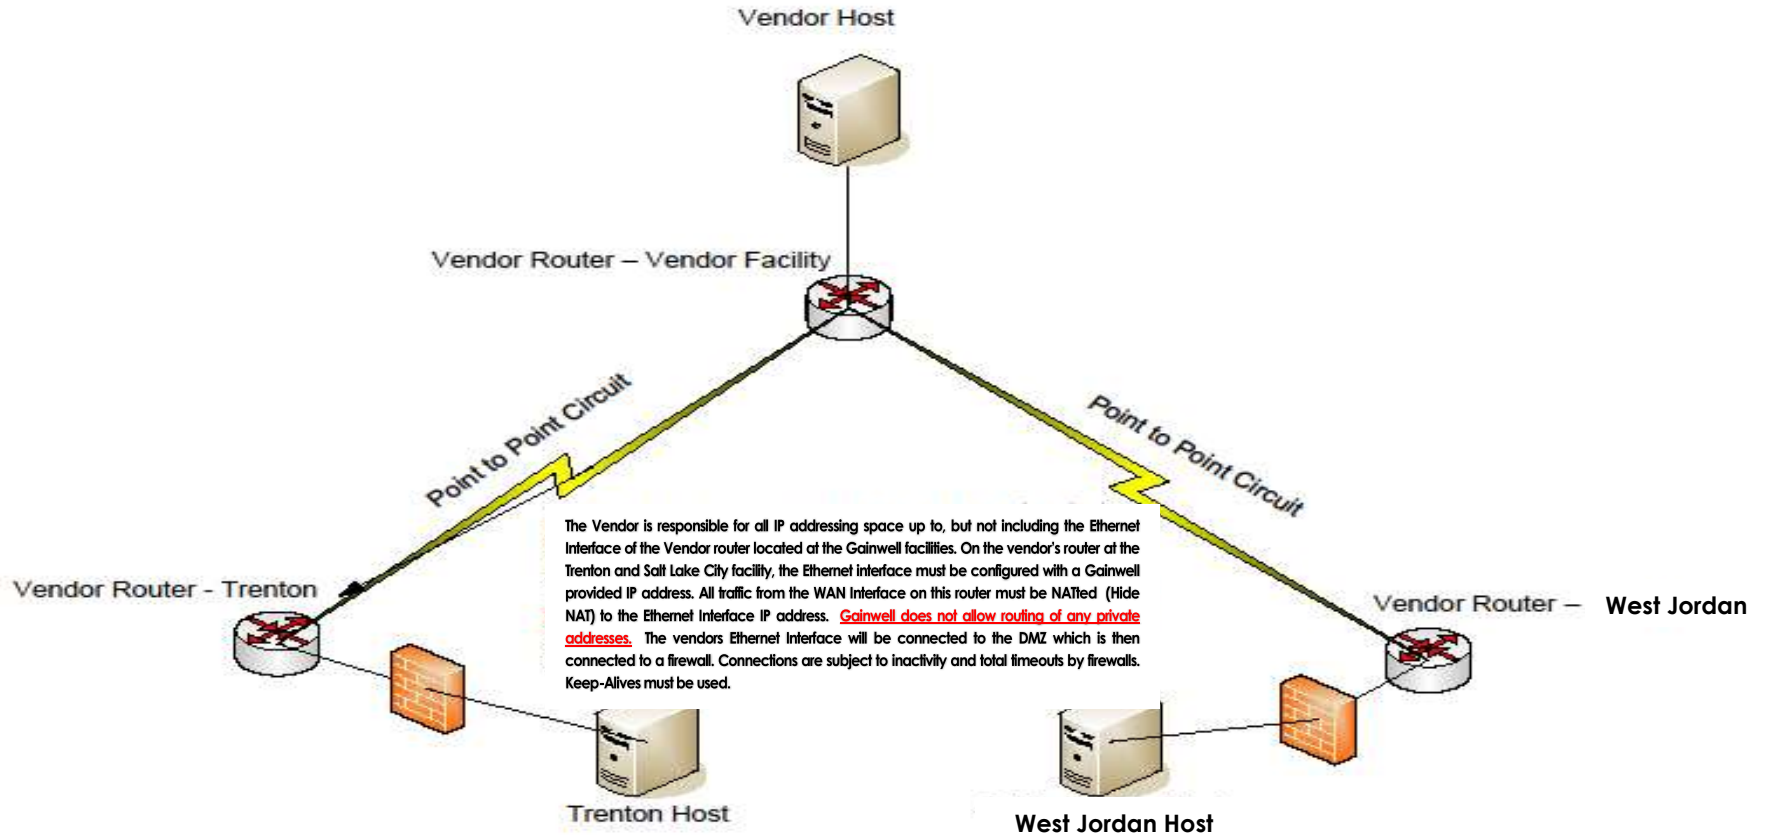

- PayloadTypeIllegal – illegal value provided for PayloadType. Received {sent value} Expecting X12_270_Request_005010X279A1
- ProcessingModeIllegal – Illegal value provided for ProcessingMode. Received {sent value} Expecting RealTime
- ProcessingModeRequired – The field ProcessingMode is required but was not provided
- PayloadIDRequired – The field PayloadID is required but was not provided
- TimeStampRequired – The field TimeStamp is required but was not provided
- UserNameRequired – missing UserName THIS IS ONLY FOR MIME
- PasswordRequired – missing Password THIS IS ONLY FOR MIME
- PayloadRequired – missing Payload
- SenderIDRequired – The field SenderID is required but was not provided
- SenderIDIllegal – Illegal value provided for SenderID. Received {sent value}
- ReceiverIDRequired – missing ReceiverID
- ReceiverIDIllegal – Illegal value provided for ReceiverID. Received {sent value} Expecting 610515
- CORERuleVersionRequired – The field CORERuleVersion is required but was not provided

SOAP FAULT - Unknown Username or Password THIS IS ONLY FOR SOAP

3) Application errors.

- Errors at this level will be returned as they normally are within the payload of the 271 response.

2.9

POS / MEVS Connectivity

2.10 Assignment Of Vendor Identification Numbers

Gainwell Technologies will be responsible for assigning a unique vendor identification number to each vendor approved by the State of New Jersey as a telecommunications network vendor. The State, following approval of the vendor as a telecommunications network vendor, will advise Gainwell Technologies of the vendor approval. Gainwell Technologies, following receipt of the State notification, will assign a unique vendor identification number to the vendor and will advise the vendor of their assigned identification number in writing.

2.11 Vendor Testing Requirements

All network vendors that have been approved by the State will be subject to testing requirements before the network vendor will be approved to submit production eligibility inquiry transactions to MEVS. Switch vendors will be required to demonstrate the ability to produce error-free 270 eligibility inquiry transactions, perform appropriate error message processing on 270 eligibility inquiry transactions determined by Gainwell Technologies to be in error, and return response data to providers that is consistent with the response data present on the 271 transactions returned to the switch vendor by MEVS. After the switch vendor has demonstrated these capabilities, the switch vendor will be technically approved for production.

Gainwell Technologies will be responsible for supporting switch vendor testing, including the review of switch vendor test results and the approval of the switch vendor for production assuming all testing requirements have been satisfied.

2.12 Input Transaction Specifications (270)

Each 270 eligibility inquiry transaction initiated by the switch vendor and each 271 eligibility response transaction returned to the switch vendor by Gainwell Technologies must be preceded by the following string prior to the ISA envelope. The three-field character string, which must be present at the beginning of each transaction, is defined as "XXX1234512345678" where:

XXX constitutes the three (3) character Switch Identification assigned to the switch vendor by Gainwell Technologies. This field must be valued by the switch vendor on the incoming 270 eligibility inquiry transaction and will be returned to the switch vendor in the corresponding envelope field on the 271 response transaction.

12345 constitutes a transaction identifier assigned to the transaction by the switch vendor. This transaction identifier, which originates from the switch vendor, will be returned to the switch vendor in the corresponding envelope field on the 271 response transaction.

12345678 constitutes a control field valued and used by Gainwell Technologies. This field is not required to be populated on the incoming 270 eligibility transaction but will be populated by Gainwell Technologies and returned to the switch vendor on the 271 response transaction.

Each transaction must contain only one patient request. Each 270 request must have only one ISA/IEA, one GS/GE, one ST/SE, and a single 2100C Subscriber Loop.

In addition each 270 eligibility inquiry transaction initiated by the switch vendor and each 271 eligibility response transaction returned to the switch vendor by Gainwell Technologies must be followed by a single End of Transaction (EOT) character at the end of the transaction.

SECTION 3 - ISA/IEA GS/GE ENVELOPE AND ACKNOWLEDGEMENT SPECIFICATIONS

3.1 Character Specifications

New Jersey Medicaid uses the basic character set only and not an extended Character set. Please refer to Section B.1.1.2.2 - Basic Character Set of the HIPAA ASC X12 Standards for Electronic Data Interchange Technical Reports Type 3 (TR3s) for information regarding the specifics for this character set.

3.2 Delimiter Specifications

New Jersey Medicaid uses control characters from the base control set and the extended control set for delimiters. The following delimiters are required to be used in all 270 5010 electronic data interchanges sent to New Jersey Medicaid.

HEX Value	Name	Delimiter
1D	GS GROUP SEPARATOR	DATA ELEMENT SEPARATOR
1E	RS RECORD SEPARATOR	REPETITION SEPARATOR
1F	US UNIT SEPARATOR	SUBSEQUENT SEPARATOR
1C	FS FILE SEPARATOR	SEGMENT TERMINATOR

Please be sure to remove such characters from all data content, as it will be interpreted as a delimiter. **Data interchanges that use delimiter values other than the above required values will be rejected from processing.**

3.3 ISA/IEA GS/GE Envelope Loops, Segments, Fields and NJ Medicaid Specific Requirements

The following tables outline the HIPAA segment and field specifications for submitting Envelope Transactions to New Jersey Medicaid. The **Usage** column indicates whether the segment or field is required (R) or situational (S). These are all as defined by the national standard. The **NJ Medicaid Specific Requirement** column indicates when there is a requirement specific to New Jersey Medicaid, which supplements the national standard. No entry in this column indicates the standard is followed. Segments and/or fields, which will be Ignored by New Jersey Medicaid, are also indicated in this column.

Loop	Field	Description	Usage	NJ Medicaid Specific Requirement
ISA		INTERCHANGE CONTROL HEADER	R	
	ISA01	Authorization Information Qualifier	R	
	ISA02	Authorization Information	R	
	ISA03	Security Information Qualifier	R	
	ISA04	Security Information	R	
	ISA05	Interchange ID Qualifier	R	"ZZ"
	ISA06	Interchange Sender ID	R	On the 270 transaction enter the three character vendor ID as assigned by Gainwell Technologies. On the 271 return transaction, Gainwell Technologies will enter the value "610515".
	ISA07	Interchange ID Qualifier	R	"ZZ"
	ISA08	Interchange Receiver ID	R	On the 270 transaction sent to Gainwell Technologies, enter "610515" followed by nine spaces. On the 271 return transaction, Gainwell Technologies will value the three character vendor ID received in field ISA06 from the corresponding 270 transaction.

Loop	Field	Description	Usage	NJ Medicaid Specific Requirement
	ISA09	Interchange Date	R	YYMMDD
	ISA10	Interchange Time	R	
	ISA11	Repetition Separator	R	Enter a RS (Record Separator) for the Repetition Separator value. Hex value 1E
	ISA12	Interchange Control Version Number	R	
	ISA13	Interchange Control Number	R	
	ISA14	Acknowledgement Requested	R	"0". Gainwell Technologies does not return TA1 Acknowledges.
	ISA15	Interchange Usage Indicator	R	When sending a test transaction, enter "T". When sending a production transaction, enter "P".
	ISA16	Component Element Separator	R	Enter a US (Unit Separator) for the Component Element Separator value.
GS	GS	FUNCTIONAL GROUP HEADER	R	
	GS01	Functional Identifier Code	R	
	GS02	Application Sender's Code	R	On a 270 transaction enter the three-character vendor ID assigned by New Jersey Medicaid. On the 271 return transaction, Gainwell Technologies will enter the value "610515".
	GS03	Application Receiver's Code	R	On a 270 transaction, enter "610515". On the 271 return transaction, Gainwell Technologies will enter the value received in GS02 from the corresponding 270 transaction.
	GS04	Date	R	
	GS05	Time	R	
	GS06	Group Control Number	R	
	GS07	Responsible Agency Code	R	
	GS08	Version/Release/ Industry Identifier Code	R	"005010X279A1"
GE	GE	FUNCTIONAL GROUP TRAILER	R	
	GE01	Number of Transaction Sets Included	R	
	GE02	Group Control Number	R	
IEA	IEA	INTERCHANGE CONTROL TRAILER	R	
	IEA01	Number of Included Functional Groups	R	
	IEA02	Interchange Control Number	R	

SECTION 4 - 270 ELIGIBILITY REQUEST SPECIFICATIONS

4.1 270 Eligibility Request Loops, Segments, Fields and NJ Medicaid Specific Requirements

The following tables outline the HIPAA segment and field specifications for submitting 270 Eligibility Request transactions to New Jersey Medicaid. The **Usage** column indicates whether the segment or field is required (R) or situational (S). These are all as defined by the national standard. The **NJ Medicaid Specific Requirement** column indicates when there is a requirement specific to New Jersey Medicaid, which supplements the national standard. No entry in this column indicates the standard is followed. Segments and/or fields, which will be Ignored by New Jersey Medicaid, are also indicated in this column.

SECTION 5 - 271 ELIGIBILITY RESPONSE - SPECIFICATIONS

5.1 271 Eligibility Response Loops, Segments, Fields and NJ Medicaid Specific Requirements

The following tables outline the HIPAA segment and field specifications for receiving 271 Eligibility Response transactions from New Jersey Medicaid. The **Usage** column indicates whether the segment or field is required (R) or situational (S). These are all as defined by the national standard. The **NJ Medicaid Specific Requirement** column indicates when there is a requirement specific to New Jersey Medicaid, which supplements the national standard. No entry in this column indicates the standard is followed. Segments and/or fields, which will be ignored by New Jersey Medicaid, are also indicated in this column.

ALL	1 st Production version of the 5010 NJ Medicaid 270/271 HIPAA Companion Guide.

May 2011 Version

PAGE#	CHANGE
ALL	1 st DRAFT version of the 5010 NJ Medicaid 270/271 HIPAA Companion Guide.

APPENDIX 2 – SUPPORTED SERVICE TYPES

The following service type codes are supported by MEVS:

Specific Codes

1 – Medical Care	76 – Dialysis
2 – Surgical	78 – Chemotherapy
4 – Diagnostic X-Ray	80 – Immunizations
5 – Diagnostic Lab	81 – Routine Physical
6 – Radiation Therapy	82 – Family Planning
7 – Anesthesia	86 – Emergency Services
8 – Surgical Assistance	88 – Pharmacy
12 – Durable Medical Equipment Purchase	93 – Podiatry
13 – Ambulatory Service Center Facility	98 – Professional (Physician) Visit-Office
18 – Durable Medical Equipment Rental	99 – Professional (Physician) Visit-Inpatient
20 – Second Surgical Opinion	A0 – Professional (Physician) Visit-Outpatient
33 – Chiropractic	A3 – Professional (Physician) Visit-Home
35 – Dental Care	A6 – Psychotherapy
40 – Oral Surgery	A7 – Psychiatric- Inpatient
42 – Home Health Care	A8 – Psychiatric- Outpatient
45 – Hospice	AD – Occupational Therapy
47 – Hospital	AE – Physical Medicine
48 – Hospital-Inpatient	AF – Speech Therapy
50 – Hospital-Outpatient	AG – Skilled Nursing Care
51 – Hospital-Emergency Accident	AI – Substance Abuse
52 – Hospital-Emergency Medical	AL – Vision (Optometry)
53 – Hospital-Ambulatory Surgical	BG – Cardiac Rehabilitation
62 – MRI/CAT Scan	BH – Pediatric
65 – Newborn Care	MH – Mental Health
68 – Well Baby Care	UC – Urgent Care
73 – Diagnostic Medical	

Generic Code

- 30 – Health Benefit Plan Coverage

Service type codes returned in the 271 will be based upon the submitted service type codes in the 270 transaction. For inquiries submitted with either a “30” or an unsupported service type code, these specific service type codes will be returned if they are an eligible service and EB01 will be valued with “1” (Active Coverage) – 1, 33, 35, 45, 47, 48, 50, 86, 88, 98, AL, MH, UC. Non eligible service types of these specific supported service type codes would not be returned in this scenario.

If a 270 is submitted with one or more of the above listed specific service type codes and the beneficiary has Medicaid eligibility and the service type(s) are an eligible service, then the submitted specific service type code(s) will be returned in the 271 and EB01 will be valued with “1” (Active Coverage). Submitted non covered service types would not be returned in this scenario.

If a 270 is submitted with one or more of the above specific supported service type codes and the beneficiary has Medicaid Eligibility, but for a plan which does not cover any of the submitted service type code(s) then EB01 will be valued with “I” (Non-Covered) and the submitted service type codes will be returned in the 271.

APPENDIX 3 – PLAN NAMES

The following names will be valued in EB05 on the 271 in Loop 2110C when applicable:

- NJFC/Medicaid
- Institutional Resident
- Presumptively Eligible Preg Women
- NJ Suppl Prenatal Care Program
- Medically Needy
- DYFS/Institutional
- Institutional Resident
- Childrens Behavioral Health Services
- DYFS
- PAAD
- General Assistance
- Cystic Fibrosis
- Juvenile Services
- Depart. Of Corrections
- County Juvenile Services
- Senior Gold
